

High Performance Apache SpamAssassin

Michael Parker

ApacheCon October 2006

<http://people.apache.org/~parker/presentations/>

Introduction

- What is High Performance?
- Running Faster
- Performing Better
- Easier Maintenance

What is High Performance?

- Make it go faster
- Make it perform better
- Make it easier to maintain

Running Faster

- Hardware Resources
- spamassassin vs spamd/spamc
- Network Checks
- Using Bayes
- Turning off what you do not need

Performing Better

- FP vs FN Rates
- Third-Party Rulesets
- Custom Rules/Plugins
- Customized Scoring

Easier Maintenance

- SQL User Preferences
- Third-Party Management Tools
- Custom Management Tools
- Commercial Solutions

Beyond High Performance

SpamAssassin
